CHECKLIST FOR CHILDHOOD INJURY

Is there any unreasonable delay in presentation?	Is there one or several versions of history of injury?	Have there been any changes in the history?	Is the injury reasonably explained by the history?
Do you clearly understand what is being said?	Is there anything unusual about this injury?	Bearing in mind the child's development is it possible for him/her to have done what is suggested?	How does the child and adult relate to one another?
Are there any other additional injuries (consider xray, opthalmoscopy)?	Have there been any previous injuries, accidents, investigations or admissions to hospital?	Are there any risk factors in the family such as drug and alcohol abuse, domestic violence, or mental health problems in either parent?	Is the child known to Social Work?

Child's name **d.o.b**
